

# REVINO *bottles*

**We're on a mission to save the planet by collecting, washing, and reusing wine bottles in Oregon and beyond.**

## Here's the Problem:

**Recycling isn't working. Reuse is better anyway.**

- The United States lacks a nationwide system for returnable, reusable glass bottles – a standard feature in almost every industrialized country worldwide.
- **16.2 billion** glass bottles & containers are consumed annually in the US and a whopping **70%** of those end life in our landfills, with national recycling rates lower than **30%**.
- Producing a single-use glass wine bottle emits more carbon dioxide than the winemaking process itself.

## Here's the Solution:

### Meet Revino

Revino offers the only glass wine bottle in the U.S. specifically designed for reuse, along with reclamation and sanitation services for wine and other beverage producers utilizing glass. Our system is a continuous cycle: from the initial bottle manufacturing and distribution to consumption, redemption, sanitization, and reuse.

We set up shop in the Willamette Valley, Oregon's premier wine destination, and partnered with over 60 wineries in 2024, our inaugural year of operations. Our expansion plans match the size of the problem we face in this single-use glass bottle ecosystem – BIG! Look for us across the West Coast, with additional wine bottle molds and service expansion to support beer, kombucha, and other beverage producers soon.

# By The Numbers

**85%**

The percentage of emissions reductions Revino bottles offer over single-use bottles.

**3**

The reuses a Revino bottle needs before breaking even on carbon emissions.

**2030**

By **2030** Revino can save **55 million lbs CO2** & divert **23 million lbs** of waste!

**50**

The number of times a Revino bottle can be reused with proper care.

**60+**

The number of wineries that will use our custom reusable bottles in 2024.

**40+**

Return locations in Oregon ready to accept empty Revino bottles after they've been enjoyed. We're adding more sites every week!
